Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 1-73 are pending in this application. Claims 64-69 are withdrawn from consideration as being directed to a nonelected invention.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-63, 70-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elers et al. (6,482,262) for the reasons listed in the previous office action.

Response to Arguments

Applicant's arguments filed 8/1/05 have been fully considered but they are not persuasive.

Applicant first argues that the reference does not provide how one of ordinary skill in the art would have been motivated to modify the teachings to reach the claimed organometallic chemical (p.3).

The examiner agrees in part. It is first noted that the independent claim 1 merely specifies an organometallic chemical and no specific materials. Elers specifically teaches a vast list of materials including organometallic materials – two full columns of text as noted by the applicant. One skilled in the art would realize that a variety of materials could be utilized including the broad category of organometallic materials as fairly taught by Elers. Hence,

Art Unit: 1762

motivation has been provided as to why one skilled in the art would reasonably expect to use organometallic materials.

Applicant next argues that Elers fails to teach any specific materials such as trimethylaluminum (pp.3-4).

The examiner agrees in part. It should be noted that independent claim 1 recites any organometallic material. This issue has been addressed above. Several dependent claims recite a specific organometallic material. Because the broader group of organometallic material has been previously addressed, the specific materials are inherently addressed. If the applicant were to establish criticality with the specific material used and amend the claim appropriately, the examiner will consider withdrawing the art rejection.

Applicant's arguments have been considered but are not deemed persuasive.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
